The INTEGRA ELT is a major step forward in the development of ELT technology. It is innovative, reliable and its value added features include:

- Smallest & lightest ELT
- Internal GPS
- Unique internal 406MHz back-up Antenna
- -40°C Certification (ER)
- Programming dongle
- Specific versions: Aircraft / Helicopter / Portable
- Maximum reliability, minimize size/weight

FAA TSO C126A & ETSO 2C126 Approved
Kannad Integra 406 GPS Emergency Locator Transmitter includes internal 406 back-up antenna

Five great reasons to buy the Integra ELT

1. **GPS inside**
   With GPS, the search area is reduced to just 0.03sq miles. The typical search area without GPS is 28sq miles.

2. **Antenna inside**
   GPS antenna and a back-up 406MHz antenna for continued transmission of emergency signal in various scenarios. When the aircraft suffers considerable damage through impact, often the antenna is destroyed and/or the cable between the ELT and antenna is broken, Integra's internal antennae provide the unique ability to transmit and send both aircraft identification data and GPS position even when the crew remove it from the aircraft.

3. **Portable**
   Continues to transmit even when removed from aircraft.

4. **GPS options**
   Optional NMEA Integra e-Nav can connect to aircraft's own GPS, for regular monitoring of your position.

5. **Economic installation**
   Capitalising on the benefits of built-in GPS and antennas, Integra costs less to install than systems requiring external antennas or GPS.

**Integra ELT features**
- Integrated internal 406MHz back-up antenna
- Compact size
- Operates at temperature as low as -20°C (-4°F version also available), with 24 hour certified transmission on 406MHz (distress) signal and over 48 hours on 121.5MHz (homing) signal
- No power supply required
- Choice of Remote Control panels with 3-wire and 2-wire installation options
- Quick and easy retrofit with universal mounting bracket
- EASA minor change approval available for most common aircraft
- Option to connect to a panel-mounting GPS using the NMEA Integra e-Nav shown below

**How the end-to-end satellite-based SAR Ecosystem works**

1. A beacon distress signal is sent from aircraft, marine vessel or individual. The Integra 406 GPS ELT provides a direct connection to global Search And Rescue (SAR) services when an emergency situation occurs. Integra ELT is automatically activated, but also offers manual activation via a remote control switch in the panel.
2. Beacon positioning/location data is relayed by satellite communications to satellite ground stations or Local User Terminals (LUTs).
3. The Local User Terminal computes the location before sending alerts to the appropriate Mission Control Centers (MCC).
4. The Mission Control Center collects, stores and sorts the data received from LUTs and other MCCs and distributes alerts to associated Rescue Coordination Centers (RCC).
5. The Rescue Coordination Center notifies and coordinates emergency response/rescue teams.

* Items in red are supplied by McMurdo Group
Kannad Integra ELT pack includes:

1. Integra ELT (AF or AF-H Class 2 only)
2. Universal Mounting Bracket + strap
3. RC200 Remote Control Switch
4. DIN-12 ELT Connector and Sub D Connector

Technical Specifications

- Automatic Fixed Emergency Locator Transmitter with G-Switch sensor
- Two-frequency ELT (121.5 / 406.037 MHz)
- COSPAS –SARSAT Class 2 (-20°C to +55°C) or class 1 (-40°C to +55°C) ER type
- RTCA DO-160/EUROCAE ED14 Environmental conditions
- TSO/ETSO Approved
  - TSO-C012a, C014a / ETSO C91a, 2C126, C142a

Operating Lifetime:
Minimum operating duration at -20°C (ELT Class 2) or -40°C (ELT Class 1) is 24 hours on 406 MHz and over 48 hours on 121.5 MHz

Controls and indicators:
- ARM/OFF/ON switch, Bright red LED, Internal Buzzer, Outside Buzzer option

Interfaces:
- DIN12 socket for remote control panel (RCP) and pin programming dongle option, BNC antenna connector

Battery:
- Replacement Interval every 6 years, Accessories directly powered by ELT battery

Unique functions:
- Integrated 406 antenna, GPS built-in (antenna & receiver)

Housing:
- Material: Molded plastic
- Colour: Yellow (Colour compounded)
- Dimensions: Installed with mounting bracket
  - 175 x 99 x 88.4mm (6.89 x 3.90 x 3.40 in.)
- Weight including batteries: Typical 850g (1.873lb) Max 875g (1.929lb)

Part Numbers : Kannad Integra 406 versions:
